-  chonka.work@gmail.com
-  [@ochonka](https://twitter.com/ochonka)
-  Kyiv, Ukraine, Remote

SKILLS:

BACKEND & CORE:

- Java 8/11/17/21
- Spring (Boot, Web, Cloud, Data, AOP, Security)
- JPA/Hibernate, Flyway, Liquibase
- Apache Kafka, Apache Camel
- JUnit 5, Mockito, Testcontainers
- REST, gRPC, OAuth2, OIDC, Keycloak

DATABASES:

- PostgreSQL, MySQL, DB2
- Elasticsearch, MongoDB, Redis

CLOUD & DEVOPS:

- AWS (SES, S3, Cognito, RDS), GCP
- Kubernetes, Docker, Terraform
- Jenkins, GitLab CI
- Kibana, DataDog, Sentry

FRONTEND:

- JavaScript, TypeScript
- React, Vue

AI & DEV TOOLS:

- Cursor IDE, GitHub Copilot
- LLM API, Prompt Engineering

METHODOLOGIES:

- Agile, Scrum, Kanban
- OOP, CI/CD, Design Patterns

OTHER:

- Git (Bitbucket, GitHub, GitLab)
- Maven, Gradle
- Jira, Confluence, Miro

LANGUAGES:

English: Upper-Intermediate

Ukrainian: Native

Oleh Chonka

Java Software Engineer

SUMMARY

Adaptable and growth-oriented Java Software Engineer with extensive experience navigating dynamic technology landscapes. The domains of projects I've worked with include **FinTech**, **Healthcare** and **eCommerce**. As a part of a team, I consider myself a great performer. My unique ability to simplify complex tasks, **decomposing** them into effective parts, which improves the product delivery process. I have a passion for structured and precise work and always **focus on product quality**.

EXPERIENCE

CodyUA (Senior Java Software Engineer) Nov 2025 - Present

Customer: FinTech | Team: 1 BE, 1 FE

Project description: **Greenfield development** of an internal platform for engagement analytics. Acting as the **Sole Backend Engineer**, I owned the full delivery cycle, taking **end-to-end ownership of project delivery** including architectural design, coding, cloud setup, and testing.

ACCOMPLISHMENTS:

- Architected and deployed **REST APIs** for metrics and high-performance reporting.
- Engineered **GCP infrastructure** (Cloud Run, Cloud SQL, IAM) and established robust CI/CD pipelines.
- Automated testing strategy with JUnit and Testcontainers, ensuring **high code coverage**.
- Spearheaded product discussions and refined technical requirements with stakeholders.

Technologies: Java 21, Spring Boot 3, GCP, Kubernetes, Docker, PostgreSQL, JUnit, Testcontainers.

Favbet Tech (Java Software Engineer) May 2024 - Aug 2025

Customer: Casino | Team: 6 BE, 1 QA

Project description: Support and development of a **highly loaded distributed** online gaming system. Writing documentation and creating sequence diagrams for game logic.

ACCOMPLISHMENTS:

- Developed and optimized critical **game-logic services** while maintaining technical documentation.
- Boosted system **observability** and resolved complex performance bottlenecks in high-load environment.

Technologies: Java 21, Spring framework, gRPC, Redis, Docker, K8s, ELK, Apache Kafka.

SPD Technologies (Senior Java Engineer) Jan 2023 - Sep 2023

Customer: Financial solution system | Team: 5 devs, 1 QA, 1 BA, 1 EM

Project description: Financial analytics platform built from scratch, emphasizing news data transformation via **Apache Camel** and **Kafka**.

ACCOMPLISHMENTS:

- Engineered robust **GCP file storage** functionality with custom access controls.
- Optimized error tracking by integrating **Sentry** for real-time performance insights.
- Architected a **custom Kafka producer tool**, accelerating QA testing significantly.
- Enhanced Scrum workflow by integrating a tailored retrospective process.

Technologies: Java 17, Spring Boot 3, Kafka, Camel, GCP, Terraform, K8s, Postgres.

EDUCATION:		
Bobocode		
Training program Java Ultimate 2.0 (Completed)		
Nov 2022 - May 2023		
University NURE (Kharkiv, Ukraine)		
Master's degree, Computer Technology		
Sep 2014 - May 2017		
PROJECTS:		
Bring - custom framework inspired by Spring IOC, developed in a team of 8.		
Bibernate - custom ORM framework, developed by a team of 8 people.		
Job Hunter CRM - Chrome tool for job search, streamlining tracking and applications.		
Intellias (Middle Java developer)		Mar 2022 - Dec 2022
Customer: European financial company Team: 7 devs, 1 QA, 1 BA		
Project: Core banking services. Handled configurations, Kafka communication, and document storage in Minio(S3).		
ACCOMPLISHMENTS:		- Managed the seamless transition to Notify+, ensuring zero system downtime. - Resolved over 1000 Sonar issues, enhancing code maintainability and security. - Implemented end-to-end Kafka processes, including publishing business logic. - Strengthened stability through comprehensive unit and integration test suites.
Technologies: Java 11, Spring Boot, Hibernate, Kafka, SonarQube, JUnit, Mockito, PostgreSQL.		
Ciklum (Java Software Engineer)		Jul 2021 - Nov 2021
Customer: Saudi Arabia Government		
Project description: Repurposed a system management tool into a full HR platform with self-assessments.		
ACCOMPLISHMENTS:		- Spearheaded the transformation of a legacy system into a modern HR platform. - Developed core self-assessment modules and internal HR management features.
Technologies: Java 11, Spring framework, MySQL, DB2, Hibernate.		
NIX Solutions (Middle Java Engineer)		Aug 2019 - Nov 2020
Customer: Data scientists and developers		
Project description: Developed a workbook platform for testing ML models instantly without 3-hour deployment delays.		
ACCOMPLISHMENTS:		- Engineered a workbook tool that eliminated 3-hour wait times for model testing. - Conducted architectural research and presented solutions for scalable platform design. - Maintained high-availability backend infrastructure for data science workflows.
Technologies: Java 11, Python, Docker, K8s, MLflow, Airflow, Spark, HDFS.		
Sednor Holdings Limited (Java Software Engineer)		May 2016 - Jul 2019
Customer: Floral E-Commerce		
Project description: Backend for flower wholesale web and mobile applications from the ground up.		
ACCOMPLISHMENTS:		- Built client-facing backend services from the early conceptual stages. - Collaborated on delivering a full-featured product from scratch for web and mobile. - Optimized and extended core functionalities to support rapid business growth.
Technologies: Java 8, Spring, SQL, AWS (EC2, S3, Cognito), ReactJs.
